ELITE BODY & MED SPA

Elite Body and Med Spa is now offering

# EMSCULPT®

**Build Muscle and Burn Fat**

Current non-invasive body shaping therapies address fat and skin. But what happens when one has less than an inch of pinchable fat, or wants to **improve the tone and shape of one's stomach or buttocks?** The EMSCULPT is the only procedure to help both women and men **build muscle and sculpt their body**. In addition, the EMSCULPT creates the world's first non-invasive **buttock toning procedure**.

**New data indicates a 28% reduction in fat at 6 months!**

## Am I A Candidate?

Anyone can benefit from the EMSCULPT procedure. Ask your provider for more details.

## What Is The Treatment Time?

EMSCULPT is a 30-minute treatment with minimum of 4 sessions scheduled 2-3 days apart. Your provider will help you create a treatment plan tailored to your specific goals.

## What Does It Feel Like?

The EMSCULPT procedure feels like an intensive workout. You can lay down and relax during the treatment.

## Is There Any Downtime? Any Pre/Post Treatment Preparation?

The EMSCULPT is non-invasive and requires no recovery time or any pre/post treatment preparation.

## How Fast Will I See Results?

You begin to feel tangible results right after the treatment. Positive results are usually reported two to four weeks after the last session and continue to improve for several weeks following the treatments.

## How Does it work?

The non-invasive HIFEM® (High-Intensity Focused Electromagnetic) technology induces supramaximal muscle contractions not achievable through voluntary contractions. When exposed to supramaximal contractions, the muscle tissue is forced to adapt to such an extreme condition. It responds with a deep remodeling of its inner structure that results in muscle building and sculpting your body while burning fat.
